Significant world events have contributed to the review of emergency management methods and trauma support programs by government and industry in search of best practices. Emergency management programs require effective partnerships between emergency and psycho-social services. Psycho-social programs such as crisis support teams for emergency response personnel and families of victims as well as employee assistance programs are all providing unprecedented levels of support. Training and preparation are the keys to an effective crisis response to the changing nature of emergencies, human and natural disasters such as technological accidents, infectious disease outbreaks and terrorism.
